»»» High-Efficiency D.E. Filter Valve

SUPERIOR FLOW WITH LOW  
PRESSURE DROP

## NEW AND IMPROVED FOR INCREASED EFFICIENCY.

SelectaFlo™ high-efficiency backwash valves are hydro-engineered to provide superior flow with low pressure drop. An easy-to-use trigger action handle lets you select from four valve/filter functions—filter, backwash, pump to waste or recirculate—while an innovative design makes maintenance quick and simple. Complete with an integral sight glass that lets you see when the backwashing cycle is complete, SelectaFlo valves are ideal for applications requiring high efficiency and low head loss.

**Innovative lock ring and seal carrier** minimize service time

**Advanced hydro-engineering** for up to 90% less head loss than multiport valves

**Redundant stem seals and cam-driven waste port seal** offer maximum reliability

**Built-in sight glass** provides convenient backwash viewing

**Integral bottom waste port** simplifies winterization

**Rugged ergonomic handle** allows for easy selection of four positions: filter, backwash, pump to waste or recirculate

**Versatile ports** accept various pipe sizes for easy installation

SPECIFICATIONS				
MODEL	PORT SIZE	MOUNTING	POSITIONS	FILTER MODEL
SPO425	2" SKT / 2.5" SLIP	SIDE	4	DEP 500 Series ProGrid™

**Exclusively designed** to fit Hayward® ProGrid and DEP 500 Series D.E. filters
